

## Legend (APPLE-F3)

<b>Anatomical</b>	The condition being claimed contains the hallmarks of either disease, overuse, or injury among other causes consistent with the correct anatomy for the underlying diagnosis.
<b>Pathology</b>	The condition follows an expected clinical course when mechanism of injury or disease process is taken into account with reasonable boundaries of the environment and history of the patient.
<b>Prognostic Testing</b>	There has been reliable testing to predict the likely outcome of a disease or ailment. Is there testing indicating a medical prognosis and relative severity of the condition.
<b>Laboratory</b>	Laboratory testing(if needed) is consistent with the underlying diagnosis to confirm the presence or stability of a disease process.
<b>Etiology</b>	The disease or condition claimed has an identifiable manner or causation consistent with the underlying diagnosis and mechanism of its origination.
<b>Function</b>	There is a clear limitation of activity imposed by the disabling condition on self support or upon the upon the person's ordinary activity (Ideally Employment Based)
<b>Three (3)</b>	Is there a clear diagnosis?
	Can you draw a correlation between service connection and the condition?
	How is this disabling enough to effect work/life?

How many dependent children who are under the age of 18?	2
What is your marital status?	Married

## Rating Projection Summary

Combined Rating Projection	
<b>90%</b>	This Rating represents the combination of all HIGH and MODERATE Ratings. This is the most optimistic and generous outcome while assuming nothing improves your case or you obtain no more supporting medical evidence.
<b>70%</b>	This Rating Represents 1/3rd of available HIGH probability conditions and 2/3rds of MODERATE conditions listed. This is the middle ground of potential ratings which assumes some loss of medical support in your case.
<b>60%</b>	This Rating represents 1/3rd of available HIGH probability conditions and conversion of 1/3rd of moderate conditions to be substantiated by the rater. This is the bleakest of outcomes, but could be used as a baseline for planning future income.
IMO Benefit	
<b>0</b>	# of conditions that may benefit from an Independent Medical Opinion (IMOs). IMOs can help support borderline conditions, support in a high rating of severity, or support a service connection based on medical evidence.

	Combined Award Projection/month	Yearly
<b>90%</b>	<b>\$2,658.91</b>	<b>\$31,906.92</b>
<b>70%</b>	<b>\$2,040.28</b>	<b>\$24,483.36</b>
<b>60%</b>	<b>\$1,639.88</b>	<b>\$19,678.56</b>
